### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***RESTRICTION/ELECTION***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 and 20-21, drawn to a data processing system software having a function to process data, classified in class 705, subclass 51.
  - II. Claims 13-19, drawn to a copy protection method having read-only and writable storage sections, classified in class 705, subclass 57.
  - III. Claims 22-25, drawn to a method of image display system having a function to display image content and information regarding the image content, classified in class 384, subclass 14.04.
  - IV. Claim 29, drawn to a service system software having a function to process data, classified in class 705, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as data processing system software having a function to process data. Invention II has separate utility such as copy protection method having read-only and writable sections. Invention III has separate utility such as displaying image content and information relating to image content. Invention IV has separate utility such as service system having a function to process data. MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
